Diesel resistant, self extinguishing heat shrinkable identification sleeve

TECHNICAL DATA SHEET

Revision Number. 1.2
Last Edited 22. marts 2024

The WM-DR-3X Heat Shrinkable Wire Markers are made of diesel resistant, heat shrinkable polyolefin tubing with ideal printability properties for identification purposes, which provides fluid resistance as per NF-F00-608. Ideal for applications where diesel resistancy characteristics are required. This product is designed for use in railway and aerospace applications, wire bundling harnesses and assemblies, panel building. The fluid resistance of the material has passed the NF-F00-608 linked to SNCF specifications where especially oils for long periods have been tested at elevated temperatures. Meets ASTM D2671 & UL VW-1 standard for flammability which makes the material self-extinguishing and passes vertical burn test. The sleeve meet the material requirements of the SAE-AMS-DTL-23053/6 class 1.

Use FTI-X or FTI-HXX for best printing and fluid resistance performance.
